Projects

Nike Landing Page Website (React & Tailwind CSS)

- Successfully implemented full responsiveness for the website by leveraging **Tailwind CSS**, ensuring an optimal viewing experience across various devices and screen sizes
- Leveraged React's component-based architecture to create a scalable and efficient user interface
- Made the project available online by deploying the website using Netlify
- *This project not only honed my technical skills in the front-end but also strengthened my ability to collaborate effectively within a team, troubleshoot challenges, and deliver a high-quality product*

Portfolio Website (JavaScript & React)

- Conceptualized and developed a personalized portfolio website using **JavaScript and React**, showcasing my skills, projects, and personal achievements
- Ensured a responsive and mobile-friendly layout using media queries, optimizing the website for seamless viewing on a variety of devices
- Crafted in such a way that the website is visually appealing with a focus on elegant animations to enhance user engagement and interaction
- Deployed using Netlify for efficient hosting and automated deployment processes
- Utilized Git for version control, maintaining a clean and well-documented commit history

Ochi, Awarded Website Clone (React,, Tailwind & Framer Motion)

- Successfully created a fully responsive and eye-sparkling Ochi Website using **React**, **Tailwind** and **Framer Motion**
- Applied optimization techniques to enhance website loading speed and responsiveness, delivering a smooth and efficient user experience
- This project revealed my website building abilities where my thoughts are out-of-the box and pretty much surprised myself
- This project enhanced my React expertise, pushed the boundaries of animation through advanced techniques with Framer Motion, and elevated my design aesthetics by leveraging Tailwind styling to create a next-level user interface experience
- Implemented version control using Git and deployed directly via Netlify

Technical Skills

- **Languages :** JavaScript, Python, SQL
- **Full Stack development :** HTML, CSS, JavaScript, TypeScript, React, Next, Python, Tailwind, Sass, Restful APIs
- **Strongest areas :** React, Next, Tailwind
- **Database :** MySQL, PostgreSQL
- **Developer tools :** VS code, GitHub, JSFiddle, Vercel, Heroku, Netlify

Education

Vivekananda Global University   *Jaipur, India*
Bachelor of Technology (Robotics)   *2019 - 2023*
7.5 CGPA

Honors & Courses

Self-taught programming using several certified websites include

- W3schools
- Sololearn
- freecodecamp, Codecademy and youtube
- **Solved 200+ problems** on Leetcode, Codechef and Hackerrank
