Projects

Responsive Ecommerce Website (Html, CSS & JavaScript)
- Crafted an intuitive and **responsive user interface**, ensuring a seamless and enjoyable shopping experience for customers.
- Implemented a dynamic product catalog with interactive features, enabling users to browse and filter products effortlessly.
- Ensured cross-browser compatibility and responsiveness for optimal viewing on various devices, enhancing accessibility and user engagement.
- Applied custom styles using **CSS** to enhance the website's visual appeal and maintain a consistent branding theme.
- *This project not only honed my technical skills in web development but also strengthened my ability to collaborate effectively within a team, troubleshoot challenges, and deliver a high-quality product.*

Portfolio Website (JavaScript & React)
- Conceptualized and developed a personalized portfolio website using **JavaScript and React**, showcasing my skills, projects, and personal achievements.
- Ensured a responsive and mobile-friendly layout, optimizing the website for seamless viewing on a variety of devices.
- Integrated a contact form for potential employers or collaborators to reach out, enhancing accessibility and facilitating communication.
- Applied custom styling using **CSS-in-JS solutions or styled-components** to create a consistent and visually appealing design that aligns with personal branding.
- Utilized Git for version control, maintaining a clean and well-documented commit history.

Modern UI/UX GPT-3 Website (JavaScript & React)
- Pioneered the development of an innovative website leveraging GPT-3's capabilities, employing modern UI/UX design principles to create an engaging and intelligent user experience.
- Applied optimization techniques to enhance website loading speed and responsiveness, delivering a smooth and efficient user experience.
- Leveraged React's capabilities for real-time updates, ensuring that users receive instant responses and updates as they interact with the website.
- Implemented version control using Git, maintaining a well-documented repository for effective collaboration and future development.

Technical Skills

- **Languages :** JavaScript, Python, SQL
- **Full Stack development :** HTML, CSS, JavaScript, TypeScript, React, Python, Django, Flask, Tailwind, Sass
- **Strongest areas :** Data Structures & algorithms
- **Database :** MySQL, MongoDB
- **Testing Tools :** Cypress
- **Developer tools :** VS code, GitHub, JSFiddle, Vercel, Heroku

Education

Vivekananda Global University *Jaipur, India*
Bachelor of Technology (Robotics) *2019 - 2023*
7.5 CGPA

Honors & Courses

Self-taught programming using several certified websites include

- W3schools
- Sololearn
- freecodecamp, Codecademy and youtube
- **Solved 200+ problems** on Leetcode, Codechef and Hackerrank
